

AERIAL LIFT TRAINING PROPOSAL

This proposal is based on the understanding that BULLIVANT Health + Safety will provide **Aerial Lift Training** (Scissor Lift) to your employees that will:

- Comply with: Occupational Health & Safety Act, Industrial Regulations
- Touch on specific equipment used or to be used by your company
- Reflect the current health and safety attitudes of your facility
- Be appropriate to all workers and their applications on the job

BULLIVANT Health + Safety training program includes:

- Applicable legislation
- Responsibilities of workers, supervisors & employers under the Occupational Health & Safety Act
- Accepted safe work practices
- Hazards associated with operating aerial lifts
- Outline fines & penalties for improper use of the equipment
- Lifting device & mobile equipment definitions
- Pre-shift equipment inspection and work area survey requirements
- Review site specific hazards, and controls for safe operation of an aerial lift.
- Review safety decals, load capabilities, and specific equipment requirements
- Written evaluation
- Practical exam

BULLIVANT Health + Safety will provide:

- Documentation supporting attendance upon completion of course to ensure due diligence
- Certificates and wallet cards upon completion
