

Overhead Crane Operator Safety Training

This proposal is based on the understanding that **BULLIVANT Health + Safety** will provide **Overhead Crane Operator Safety Training**.

Training will include:

- Occupational Health & Safety Legislation
- Identifying Cranes And Their Components
- Common Hazards and Accidents
- Crane Specifications & Operational Requirements
- Standard Hand Signals
- Pendant, Remote & Cab Controls
- Safe Crane Operation
- Post-operating Requirements
- Inspections – Pre-shift and Yearly Requirements
- Slings and Lifting Media
- General Rigging Requirements
- Review/Quiz
- Competency evaluation

BULLIVANT & Associates supplies:

- Handouts
- Load and sling charts
- Certificates and wallet cards upon completion

For all training done in a group environment at the clients site, the Competency Evaluations will take place immediately following the classroom portion.

For participants that attend a monthly class at BULLIVANT Health + Safety Stoney Creek training facility, the Competency Evaluation at your location will be scheduled on a date after the classroom portion has been completed.
